1. Build the Six-Row Bear Graph

Representation · Building a one-to-one bar graph from sorted objects and reading length as count

2. Guess First, Then Add the Six Rows

Fluency · Adding six addends to a total within fifty and taking a difference from an estimate

3. Four Tens and Eight Fives Hold the Same Forty

Concept · Regrouping one collection into equal groups of a different size without changing the total

4. Turn It Around: Ten Twos, Two Tens, and the Fives in Twenty

Reasoning · Turning a multiplication around, and finding how many equal groups fill a total

5. Six Bears, Six Places, One Each

Application · Following ordinal instructions that name a bear by its old place and a place by its new one
